ROHAN RAMESH S R

SENIOR SOFTWARE ENGINEER

+91 82898 79846 | rohanramesh33@gmail.com | Bengaluru, India

PROFESSIONAL SUMMARY

Senior Software Engineer with 4+ years of experience building and supporting backend APIs, event-driven integrations and customer-facing applications. Strong experience in Node.js, TypeScript, REST APIs, GraphQL, Kafka, PostgreSQL and AWS, with additional delivery using React and Next.js. Skilled in production troubleshooting, root-cause analysis, API modernization and end-to-end delivery across distributed teams.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, SQL, Java

Backend and APIs: Node.js, Express.js, REST APIs, GraphQL Federation, Axios, API integration

Frontend: React.js, Next.js

Data and messaging: PostgreSQL, Oracle, MongoDB, ClickHouse, Redis, Apache Kafka, Avro

Cloud and delivery: AWS S3, AWS Lambda, AWS Secrets Manager, CloudWatch, Docker, Jenkins, CI/CD

Testing and tools: Postman, JMeter, Git, Bitbucket, VS Code, IntelliJ, pgAdmin, DBeaver

Ways of working: Agile, Scrum, SDLC, production support, root-cause analysis

PROFESSIONAL EXPERIENCE

Senior Software Engineer | Hewlett Packard Enterprise (HPE)

Mar 2026 – Present | Bengaluru, India

- Developing secure, high-throughput backend services for a confidential Government of India client; project details are restricted under client confidentiality.
- Develop Node.js and Express backend services for customer booking, tariff and integration workflows, using REST APIs, PostgreSQL and Apache Kafka with Avro messaging.
- Implement and validate booking transformations and tariff-processing capabilities; build event-processing resilience and recovery tooling using Redis and ClickHouse.
- Developed role-based RCA workflows and six management reports using React and Next.js, expanding beyond my primary backend responsibilities; migrated report integrations to the generated TypeScript client.
- Contribute to reporting and file-delivery workflows using Node.js, ClickHouse and SFTP, with a focus on reliable processing and maintainable integrations.

Software Engineer | Tech Mahindra

Mar 2022 – Feb 2026 | Chennai, India

- Contributed to Nissan USA and Canada API modernization and database migration projects across the software development lifecycle.
- Modernized 21 legacy APIs handling more than 150 million requests per month by migrating from JBoss Fuse (Java/XML) to GraphQL Federation; improved response time from approximately 7 seconds to 3 seconds through schema/resolver changes and reduced redundant calls.
- Developed Node.js and TypeScript services using GraphQL Federation, Prisma and PostgreSQL; applied DataLoader batching and connection pooling to improve database access patterns.
- Supported secure API integrations using AWS Lambda and AWS services; used CloudWatch for operational troubleshooting and monitoring.
- Migrated application logic and datasets from Oracle to PostgreSQL, and performed API and load testing with Postman and JMeter to support production stabilization.

AWARDS AND RECOGNITION

- Bravo Awards – Three awards for delivery across three projects at Tech Mahindra.
- Digital Warrior – Recognized for GraphQL upskilling and delivery.
- Creating Impact Award – Hewlett Packard Enterprise (HPE), recognized for excellent performance.

EDUCATION

Bachelor of Technology (B.Tech), Computer Science and Engineering | CMS College of Engineering & Technology, Coimbatore | 2016–2020

CERTIFICATIONS

- Microsoft Certified: Azure Fundamentals
- Google Cloud Computing Foundations: Cloud Computing Fundamentals
- Software Development Course, JSpiders, Bengaluru
